

# WORRY-FREE FUNDRAISING: *Online Auctions*

*Did you know that, with Qtogo,  
you can have a successful auction  
fundraiser without any of the hassle  
and headaches of planning an  
in-person event?*

## *Online auctions are easy.*

All you need to get started are your auction items. Qtego's great design makes it easy to auction even high-value merchandise. With enhanced image layouts and boutique listings, Qtego's QSite—the personalized bidding website that includes all of your Qtego tools— gives your online auction an upscale feel that gets results.

## *Online auctions are fun.*

Engage your donors with great item descriptions and a game-like interface. Your guests can place bids, make donations, and see their progress with real-time results—from anywhere! Qtego's user-friendly format and branded graphics keep people checking back and bidding more.

## Online auctions are effective.

You don't need an in-person event to cultivate your donors. Build connections by setting up an online auction. Give donors multiple opportunities to connect with your cause, interact with your sponsors, and deepen their identification with your organization when they view your QSite, bid on items, make donations, and share auction item links with their social networks.

## Online auctions diversify your fundraising event calendar.

When you can't plan another event, don't want to lose touch with donors, or face an unexpected scheduling hiccup, Qtego can help you keep fundraising. Our online auctions are a terrific tool for keeping your organization on donors' minds and in their hearts any time of year.

## Qtego is here to help.
